

Wet and Wild

2022, Week 2 - Clues Welcoming Visitors to Our Wet & Wild

- 1. I am found from the coast of NSW, Victoria, Tasmania to South Australia.
- 2. I am often washed ashore on the beach by winds and tides.
- 3. I was hunted for my dense coat of woolly underfur and long, outer hairs that keep me warm.
- 4. I breathe air like my terrestrial relatives.
- 5. I have a gas-filled float that keeps me buoyant.
- 6. I am the largest of this type of species.
- 7. I am a quite large mottled brown wader.
- 8. My tail is barred with brown.
- 9. I have scales on my body. The upper half is black and the under half is yellow.
- 10. I arrive in Australia in August from the northern hemisphere.
- 11. My sting is painful and the person's body part should be treated in hot water at 45°C for 20 minutes.
- 12. I breed on rocks in Bass Strait between October and January.
- 13. I can spend up to 2 hours underwater before I need to come to the surface to breathe.
- 14. I have a paddle shaped tail to help me swim.
- 15. I probe my long, upturned bill into exposed mud to find food in coastal areas.
- 16. I am mainly blue and I use my tentacles to paralyse my prey.
- 17. My new born pups are almost black on the back and grey on the belly.
- 18. Each 'animal' is actually a colony that depends on each other.
- 19. I'm the world record holder for non-stop flight: travelling 11,000km in 8 days straight.
- 20. I am venomous and I have a forked tongue.
- 21. I breed in Northern Asia and Alaska.
- 22. Armadas of these organisms can be found in marine waters in the Indian and Pacific Oceans.
- 23. I can grow to weigh 350kgs and am a very agile swimmer.
- 24. I shed my skin every two to six weeks, which is more frequently than those on land.
